

Proportional Giving is giving in response to the blessings you have received. As your blessings increase (or possibly decrease) your *proportion* can remain the same. Hopefully your *proportion* will increase over time as you strive towards the goal of a Biblical tithe which is 10% of your gross income. Pray faithfully and consider your decision carefully. As a steward of God's gifts, practice the habit of offering your pledge first, in gratitude and thanksgiving, before other monthly expenses are considered.
